### RELEVANT COURSEWORK

Programming & Data Structures, Computer Game Design, Databases, Algorithms, Coding Theory, Operating Systems, Computer Security, Distributed Functional Programming, Intro to Combinatorics, Probability Theory

### RECENT WORK EXPERIENCE

#### Idealogical Foundation, Inc., Flagstaff, AZ

Founder, Lead Developer

Sep 2017 – Present

- Built a crowdsourcing website for understanding controversial topics ([idealogs.org](http://idealogs.org)) in Django
- Mastered fundamentals of full-stack web development including: M-V-T architecture, ORMs, rapid prototyping, responsive design, search, caching, asynchronous task management, VPS hosting, deduplicating backups, and profiling
- Developed idea from infancy to production without prior web development experience or outside help
- Invented a new model for aggregating and refining contextual information
- Managed all aspects of the project including: engineering, financing, corporation formation, and trademark application

#### Coconino Community College, Flagstaff, AZ

Adjunct Lecturer, Mathematics

Jan 2018 – Aug 2019

- Taught algebra to students that struggle considerably with the subject
- Devised lectures with focus on emotional aspects of learning to make courses approachable
- Brought positive energy and humor to lectures to keep students engaged
- Emphasized strong studying habits and pushed students to make connections between time investment and achievement

#### Transcaucasian Trail Association, Svaneti, Republic of Georgia

Project Manager

Jun 2018 – Sep 2018

- Provided logistical support to project attempting to connect Black and Caspian Seas via one long-distance hiking trail through the Caucasus Mountains ([transcaucasiantrail.org](http://transcaucasiantrail.org))
- Stewarded the project home base and operations center to keep project running efficiently
- Organized food and gear shopping, and managed crews when they were not in the field

Crew Leader

Jun 2017 – Sep 2017

- Designed and constructed reroutes of deteriorating hiking trails
- Supervised crews of 8-12 international volunteers on 8-day projects in a backcountry environment
- Managed diverse personalities from varied ages and backgrounds into cohesive working units
- Constantly monitored health, energy, and morale of group to ensure a safe and productive working environment
- Enforced safety-first practices at all times to maintain integrity of the project
